One Man Shrub Digger

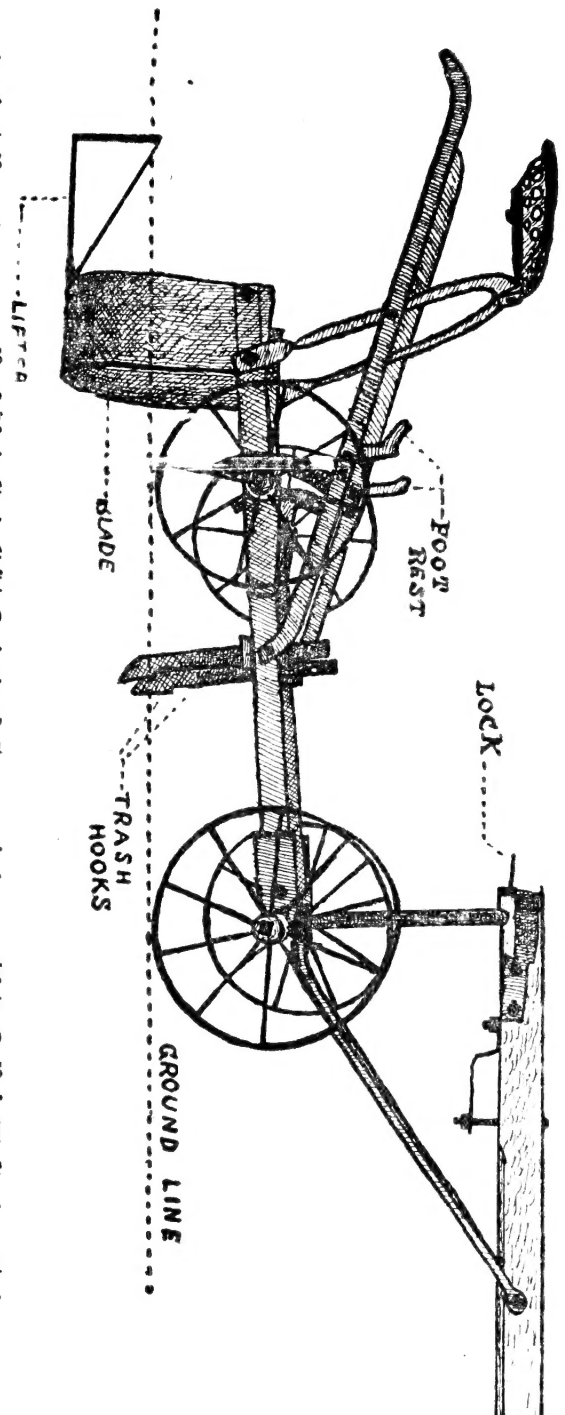

This machine is the best labor saving machine on the market. It saves the labor of two men and four to six horses. Handles as easily as a riding cultivator. For heavy 3-4 foot shrubs use four-horse eveners; for light digging only one team is required.

For pruning Evergreen roots and light digging, remove lifter, adjust depth of blade by raising or lowering back wheel adjustment. In nursery rows where three or four varieties are growing in the same row to dig one of the varieties in the middle of the row, drive down the row to variety wanted, trip lock and digger will be in position as in illustration — dig variety wanted, raise blade to upright position where it locks, and drive on.

Very fine for June Bud peaches. To dig 2 year apples wrap doubletree with burlap.

This digger is just the thing for a nurseryman with a few acres and short rows and is also just what the larger grower has been looking for. Will pay for itself the first week. Not carried in stock. Order early to have digger on hand when you want it.

Diggers with 18 to 20 inch blades are of extra heavy construction to withstand the additional strain.

Prices complete, eveners and neckyoke not included:
